- For Image II, refer to Image II brochure.
- 12" Soffit Panel is available in .032 aluminum with Linen White PVDF finish in both perforated and unperforated.
- Galvalume® is a registered trademark of Bethlehem Steel Corporation.

PAINT SYSTEMS

We use high quality paint systems designed to provide long term performance and protection. Each coating is formulated with thoroughly researched, tested and field proven pretreatments, primers, resins, and pigments that can meet your standard and performance requirements.

MS Colorfast45 This is a thermoset coating system composed of polyester resin which has been modified with a silicone resin. Much like PVDF finish, the MS Colorfast45 finish offers good protection to the elements with special consideration to chalk and fade resistance, durability, and chemical resistance.

STORAGE INSTRUCTIONS

if metal roofing or siding is not going to be used immediately, it should be stored in a dry area. It should be unbundled and stood on end against an interior wall. If materials must be stored outside, protect with canvas or waterproof paper. Allow for air circulation, do not cover air tight.

APPLICATION PRECAUTIONS

Avoid installing directly over green or damp lumber, porous insulation, or other damaging materials. The use of a moisture barrier is recommended in such situations. Strong chemicals, such as fertilizer, manure, some soils, and lime may cause damage. Storage or application near such materials should be avoided.
